EXECUTIVE SUMMARY

As part of the TotalControl dissemination work package, four short videos will be produced during the four years in which the project is running. This deliverable is the third project video and serves the purpose of giving an understanding of what the project is about.

The project video is available at the TotalControl project website since the 17th of January and can be accessed through this link: [Videos - TotalControl \(totalcontrolproject.eu\)](https://totalcontrolproject.eu/videos)

Due to the limitation on file size, the video is not uploaded to ECAS as deliverable. Instead, one will find a compilation of still images from the video below. Interested parties are encouraged to visit the website and see the video.
